

RUTHERFORD STEM LEARNING CENTRE

IN COLLABORATION WITH

# VEPROJECT

OLD AND NEW CONCEPTS OF PERPETUAL MOTION MACHINES.  
WORKING MODELS OF PERPETUAL MOTION MACHINES.  
MODELS OF DA VINCI INVENTIONS. MARBLE MACHINES.

**Do NOT miss to check out Perpetual Motion Devices & Leonardo de Vinci Inventions Exhibition!**

A perpetual motion machine is a hypothetical machine that can do work indefinitely without an energy source. This kind of machine is impossible, as it would violate the first or second law of thermodynamics. These laws of thermodynamics apply regardless of the size of the system.

Entry to Exhibition is free of charge during the STEM EXPO for schools & public.
